

FOR IMMEDIATE RELEASE

Analysis Group Promotes Preeminent Epidemiologist to Managing Principal

Boston, October 22, 2009 — Analysis Group, Analysis Group, Inc., a leading provider of economic, finance, and strategy expertise, is pleased to announce the promotion of epidemiologist [Mei Sheng Duh](#), Sc.D., to Managing Principal in our Boston office. Dr. Duh joined Analysis Group in 2001, and has been instrumental in expanding the breadth and depth of the firm's work in epidemiology, health economics, and outcomes research through her work with numerous pharmaceutical and biotechnology companies. Dr. Duh's work has encompassed the areas of drug safety, pharmacoeconomics, and product liability litigation. In addition, she has authored or co-authored more than 50 peer-reviewed articles in the medical literature.

"Mei's national reputation as a leading pharmacoepidemiologist, coupled with the outstanding quality of her client service, has enhanced Analysis Group's stature in this area," said firm President and CEO [Martha Samuelson](#).

Dr. Duh holds an M.P.H. in epidemiology and public health from the Yale School of Medicine, and an Sc.D. in epidemiology from the Harvard School of Public Health. She is an adjunct lecturer at the Harvard School of Public Health, serves as a reviewer for several prominent clinical and economic journals, and recently was elected to the American Society of Hematology in recognition for her "significant contribution to the field of hematology and the care of patients with hematological disorders."

[Analysis Group](#) is the largest privately held economic consulting firm in North America. Providing economic, financial, and strategy consulting to corporations, law firms, industry, and government agencies since 1981, the firm is distinguished by the depth of our health care expertise. Our health care clients include many of the nation's largest pharmaceutical, biotechnology, and medical device manufacturers.

Analysis Group's interdisciplinary staff consists of more than 475 professionals, with advanced degrees in economics, statistics, epidemiology, medicine, finance, accounting, and business administration. We also work closely with a network of academic experts, key opinion leaders, and physicians at leading universities who help us develop and present state-of-the-art solutions for our clients. Much of our work is published in leading academic and health care industry journals.
