111 Huntington Avenue  
14th Floor  
Boston, MA 02199

Mr. Feige specializes in the areas of finance, securities, and financial systems. He has developed complex valuation models, including discounted cash flow models, and has analyzed asset-backed securities, collateralized debt obligations, and other securitized products in support of expert testimony in a number of bankruptcy and damages matters. He has also worked on lawsuits involving derivatives valuation and closeouts under ISDA Master Agreements for bankruptcy matters. Mr. Feige has supported academic affiliates in addressing accounting issues at financial institutions, assessing complex derivatives valuations, and analyzing distressed institution credit ratings. He has managed case teams and been published in industry journals.

**EDUCATION**

2011            M.B.A., New York University Stern School of Business  
*Municipal Bond Club of New York Essay Scholarship*

2004            B.A., economics, Wesleyan University

**PROFESSIONAL EXPERIENCE**

2011–Present            Analysis Group, Inc., Boston, MA  
*Vice President (2017–Present)*  
*Manager (2013–2016)*  
*Associate (2011–2012)*

2006–2009            Compass Lexecon, Cambridge, MA  
*Consultant*

**SELECTED CONSULTING EXPERIENCE**

- Analyzed the reasonableness of a large derivatives close-out process under the ISDA Master Agreement, including extensive valuation of credit default swaps, interest rate swaps, FX, and other derivative positions.
- Estimated potential damages in various rate manipulation cases.
- Assessed credit rating impacts on large financial institutions during the financial crisis.
- Analyzed accounting issues at large financial institutions, including application of FAS 157 and off-balance-sheet accounting rules.

- Investigated and analyzed the salability of large, complex special purpose vehicle derivatives positions during the financial crisis.
- Analyzed the impact of a proposed spin-off transaction on a joint venture partner in the mining and metals industry.
- Evaluated antitrust issues and estimated damages related to multiple benchmark manipulation cases.
- Estimated the current value of aged land bonds to account for the impact of hyperinflation and to include a local return on capital in a South American country.
