

Analysis Group's Health Care Practice

We seek curious minds that thrive on collaboration, challenge, and rigorous thought to help develop real-world solutions for the health care industry. We support initiative and drive in our team members, and value versatility and creative thinking.

Analysis Group offers an array of career options and encourages you to expand your horizons

Analysis Group is unusual among consulting firms in offering a wide range of health care expertise. Our health care consultants work together across the following areas:

- Health Economics and Outcomes Research (HEOR)
- Drug Safety and Epidemiology
- Market Access, Pricing, and Commercial Strategies
- Controlled Substance Monitoring and Analytics
- Analytics for Drug Development
- Public Policy Projects
- Litigation
- Modeling and Analytics

Analysis Group provides integrated research and consulting support throughout the product life cycle

Discovery and
development

Product approval
and launch

beyond

ANALYSIS GROUP
ECONOMIC, FINANCIAL and STRATEGY CONSULTANTS

Our teams develop insights that spur health care innovations

We have a long track record of developing pragmatic approaches and solutions to critical challenges within the pharmaceutical, medical device, and biotechnology industry. New products enter competitive markets and face demands for evidence of safety, efficacy, and economic value. As an Analysis Group team member, you can help us provide the clear and early understanding of value that is critical to the success of innovative treatments.

We consult on cutting-edge issues at the forefront of health care

Across a broad range of treatments, our innovations in interactive analytics and data visualization provide solutions to our clients' most complex problems. A few recent examples include:

- Advancing the role of real-world evidence in Food and Drug Administration (FDA) drug approvals
- Predicting long-term survival benefits for novel cancer therapies
- Helping to bring individually tailored, precision medical treatments to market
- Developing strategies for payers to cover high-cost and high-benefit gene therapies
- Supporting successful clinical regulatory submissions to the FDA and the European Medicines Agency (EMA)
- Supporting successful submissions to the National Institute for Health and Clinical Excellence (NICE) and other international health technology assessment authorities

Collaborating with clients to develop new methodologies that address their most critical research needs is one thing that keeps me and our teams excited about our work. We are fortunate to have integrated expertise in technology and health outcomes research that enables our teams to rapidly design and create tailored solutions for our clients.”

JAMES SIGNOROVITCH, MANAGING PRINCIPAL, BOSTON

Analysis Group is a recognized thought leader in health care outcomes research

We have a robust record of publishing in hundreds of leading, peer-reviewed medical, outcomes, and health economics journals, as well as in high-impact business media including *The New York Times* and *The Wall Street Journal*. Because we value the contributions of every member of each research team, even those early in their careers have the opportunity to add major publications to their CVs.
