

**ALI DAHIR**  
**Vice President**

Direct: 617 422 2930  
ali.dahir@analysisgroup.com

111 Huntington Avenue  
14th Floor  
Boston, MA 02199

Mr. Dahir conducts research and economic analyses in complex commercial litigation matters. He has supported academic affiliates and industry experts across a broad range of topics, including technology, finance, and health care. In technology, Mr. Dahir's experience includes matters related to pet food manufacturing, hard disk drives, semiconductors, and space technology. In finance, he has performed analyses related to firm valuation, futures trading, residential mortgage-backed securities (RMBS), and transfer pricing. He has also supported experts in conducting damages assessments in false advertising and intellectual property disputes within the health care sector. Mr. Dahir's experience spans all phases of litigation, including fact discovery, expert reports, deposition support, and trial preparation.

## **SELECTED CONSULTING EXPERIENCE**

### **Technology**

- ***California Safe Soil LLC v. KDC Agribusiness LLC, et al.***  
Supported experts in the evaluation of trade secrets allegedly misappropriated by a larger firm that had been an investor in and partner of a smaller firm. The matter concerned a recycling bioengineering process for the manufacturing of fertilizer and pet food products. Supported a food engineering expert who identified and documented trade secrets. Supported an academic expert who assessed damages resulting from alleged trade secret misappropriation.

- **Confidential hard disk drive (HDD) manufacturer**  
Supported examination of an HDD maker's Asian manufacturing arm to assess evidence of its contributions to revenue and profit. Supported an HDD industry expert who described the technology underlying HDDs, the structure of the industry, and factors determining the success and failure of participating firms.
- ***Confidential electronics contract manufacturer v. major electronics component supplier***  
Supported experts in a case related to printed circuit board assembly (PCBA), contract manufacturing, soldering, and other manufacturing processes used in electronics assembly. Examined material from the contract manufacturer, including production plans and audits, to determine whether its manufacturing processes could have caused a key component of a power supply to fail in the field.
- **Confidential investigation of a space technology company**  
Supported investigation by a regulator that alleged that a special purpose acquisition company had made misleading statements to investors about its space technology. Supported an aerospace engineering expert with evaluation of technical claims, including results of in-space testing and how results were communicated in investor materials.

## Securities & Finance

- **Numerous confidential RMBS investor matters**  
On behalf of numerous bank clients, supported experts examining class certification, loss causation, and damages issues, as well as sampling, lending, and due diligence practices, in multiple RMBS investor cases alleging misstatements in the prospectus supplements.
- **Confidential investigation and litigation related to alleged manipulation of gasoline prices**  
On behalf of an international trading firm, provided economic analysis and consulting support to counsel in investigations involving allegations of anticompetitive and manipulative conduct in the California gasoline spot markets. Supported an expert in state and federal litigation to analyze futures trading activity of multiple trading firms.
- **Confidential arbitration involving two sports betting companies**  
Supported an expert in evaluating and estimating the fair market value of a sports betting company, including performing research on sports betting industry and conducting discounted cash flow and market-based valuation analyses.
- **Confidential litigation involving a company providing services to corrections facilities**  
Supported an expert in evaluating transfer pricing issues in relation to alleged royalty payments between two sub-entities of a company that provided inmate communications-related products to corrections facilities.

## Health Care

- **Numerous trade secret misappropriation disputes related to health care software**  
On behalf of numerous health care clients, supported experts examining lost profits and damages in multiple cases alleging misappropriation of trade secrets in relation to software used by medical care providers.

- **Confidential multinational health technology company v. smaller medical equipment manufacturer**  
On behalf of a multinational health technology company, supported experts in evaluation of false advertising and false statement allegations. Supported an expert in examining damages in relation to false advertising allegations. Supported another expert in designing and administering a survey to evaluate false statement allegations.
- **Confidential per- and polyfluoroalkyl substances (PFAS) litigations**  
On behalf of numerous manufacturers, supported experts in the evaluation of allegations of water contamination with PFAS (forever chemicals). Supported a medical oncologist in reviewing and analyzing scientific literature related to association between PFAS exposure and breast cancer.
